

# SMARTY

## VIDEO DRIVE RECORDER W/WO GPS

**BACK SIDE FACING DRIVER**

**CAMERA SIDE FACING FRONT TO STREET**

**Two models:** **KEY-BX 1000** Video drive recorder with 2GB SD memory card, cable and software  
**KEY-BX-1000 Plus** Video drive recorder w/ 2GB SD card, cable, software and GPS

### *Features:*

- \* Unbelievably easy to use. Mount camera, plug into lighter----begin recording events!
- \* Preloaded software on memory card makes set up and viewing of events simple to any PC user
- \* Built in back up super capacitor ensures recordings stay intact irregardless of a power failure
- \* Small profile design----fits easily to any windshield or dash----NO restriction of visibility
- \* Smart cylindrical designs allows easy turn of camera to view/record interior without remounting camera
- \* With embedded GPS---location, video and g-force (front/back, side/side, up/down) data all viewed together
- \* Easy management of route + driving habit through full-time recording of shocks / vibrations / speed / location
- \* Quick and easy search, play and analyzing by speed / shocks / location data

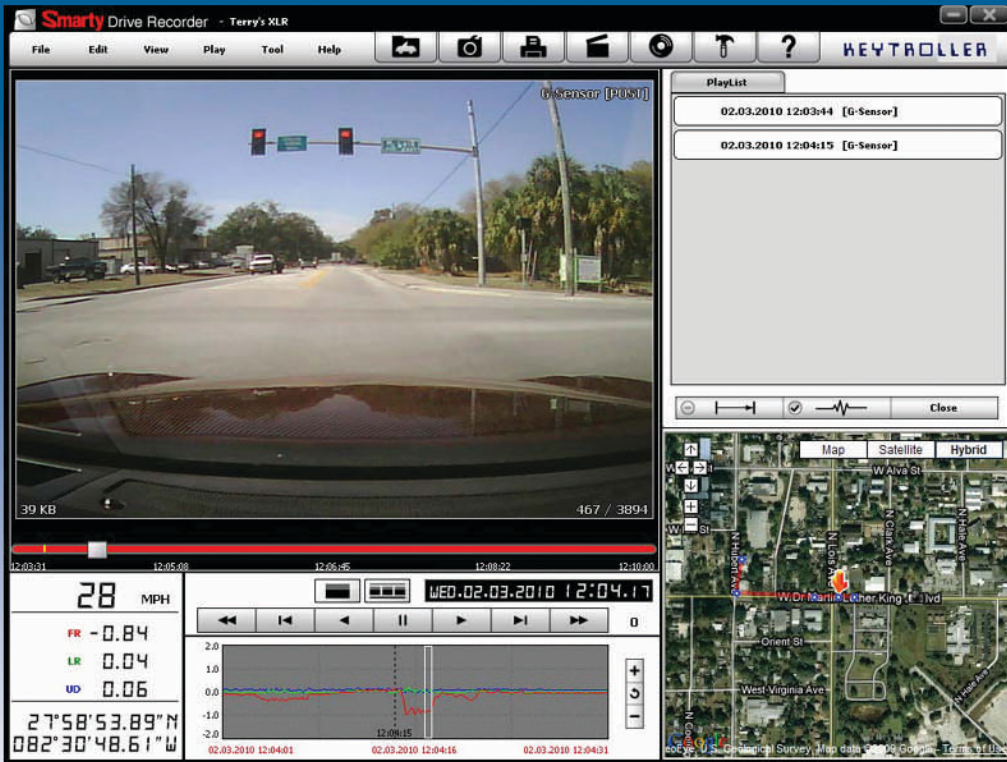

### *How it works:*

- \* Mounts to window in minutes with tape bracket and adjustable camera view
- \* When impact or sudden hard braking or acceleration occurs, device captures video before/after the event
- \* Record button on back of camera allows start of manual recording event
- \* GPS coordinates are recorded (Plus model). Video event is shown in PC software with Google map/earth
- \* To view video/map event, simply remove memory card and insert into USB reader on PC
- \* Software is pre-loaded on device's memory card along with video event recordings for easy viewing on PC

### *Applications:*

- \* Cars, trucks, buses, forklifts, construction equipment, aerial lifts, utility vehicles, carts, machinery

**KEEPS DRIVERS SAFE, ACCOUNTABLE and TRACKABLE!**

View video, event log speed, event position and screen shot location, Google Map, Hybrid, or Earth and G-force intensity ALL ON ONE SCREEN!

Export files and reports for your records and print pictures

Google Map, Earth, Hybrid can be selected here

**GPS Speed, G sensor data & GPS location data**

**Date & Time**

Speed 51 Km/h

FR 0.51

Event

Drag & Move the white line to move the playback position.

Playback speed

Remove SD memory card and take to your PC. Software is pre-loaded in card. Setup and viewing video and GPS track is simple and easy

## Specifications

- GPS---Installed on Plus model only
- G-force (impact sensor) internal 3 axis (F/B, S/S, U/D)
- G-force sensitivity: Settable 1(low) to 9 (very sensitive)
- SD flash memory card (2GB std, supports 8/16/32GB)
- Video resolution: Settable 640X480 or 320X240
- Power: 12-24V (cigarette plug standard or hardwired)
- Power consumption: 36 watt (also internal battery)
- LED indicator: (Record + overwrite)
- Buzzer: (Recording start + error)
- Operational Temperature: 14F--122F (-10C--50C)
- Recording speed: Settable 1,5,10,15,30 frames/sec
- Recording time: (based on video quality settings)  
2GB (37 min---36 hours) 16GB (7 hours--167 hours)
- Recording Modes: Continuous, by impact, by button
- PC software: Supplied in memory card, upload to PC
- Angle of camera view: 170 degrees
